Report of the Board of Manager  
v.159 1910 Pennsylvania Hospital

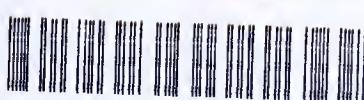

0 0001 00666146 4

PPW 145/8/3.1b 1910

04-83-900-7

Digitized by the Internet Archive  
in 2016

To the Honourable House of Representatives of the Province of Pennsylvania.

*The Petition of sundry Inhabitants of the said Province.*

Humble, simple,

That with the number of People the number of Slaveholds or Persons distinguished in Mind among their nationalities, has greatly increased in this Province.

But some of this, going at large over Town & Country, where a daily apprehension of the Visitation they may recruit: And others are continually writing their Testimonies to the great Injury of themselves and Disciples, ill disposed Persons wickedly taking Advantage of their unhappy Condition, and drawing them into unreasonable Complaints, &c.

'Not far or none of them in want of their necessities, as to submit voluntarily to the tortures  
the ungrateful base ingrates, and things in continuall the same deplorable state during the time  
whereas this was found by the Examiners of many States, that above Two Thirds of the Poor People re-  
ceived such full liberall Hospital, and thus healed properly have been perfectly cured. —

Your Hutchinson big leaves forth to represent, that the good Laws of this Province have made every thing liberal to the other British Provinces for the Relief of the Poor, yet something still remains wanting to prevent such want, which I believe is made more considerable by the additional Weight of a present Disease, peculiar to this Province, as easily be seenes if they were not educated at so great a Distance from regular & tolerable Medicine, whereby many languish out their Lives, tortured full with the Disease, downred by the feaver, deprived of light by leprosy, or gradually decaying by leprosy Hutchinson Thompson, who of the Report in the present Number of Bringay and Hastings then especially who by his care to Town and Country so discouraging nightingales, by the judicious Adoption of Physick and Surgery, he enabled to save the Blessings of Health, and he made in a few Weeks, useful Remonstrance of the Community, able to provide for themselves and Families.

The kind care our Friends have hitherto taken for the Colle<sup>y</sup> of Fish and Game, and the great  
providing a Law for their Regulation and Secrecy, however we have to wait till there being an equal  
Lands Survey for the Inhabitants. And we hope they will be of Opinion with us that a suitable Game  
Hospital could and put under proper Regulation, in the Care of Person to be appointed by this Society, and  
therefore as they shall think meet, with Power to receive and apply the charitable Contributions of  
good People towards erecting and supporting the same; and form other Provisions in a Law for  
the Purpose above mentioned, will be agreeable to God and to all the good People they represent;

Morris, Jun<sup>r</sup> & Weatherfoe humbly recommend the Friends to their serious Consideration

## MINUTES

OF THE ONE HUNDRED AND FIFTY-NINTH ANNUAL  
MEETING OF THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL

---

PENNSYLVANIA HOSPITAL, 5th Month, 2nd, 1910.

At the one hundred and fifty-eighth Annual Meeting of the Contributors to the Pennsylvania Hospital the day and year aforesaid, Joseph G. Rosengarten was called to the chair, and John T. Lewis, Jr., was appointed Secretary.

The minutes of the last meeting were read and approved.

The Annual Report of the Board of Managers was read by T. Wistar Brown, which was accepted and referred to the incoming Board to print such matter as they may deem expedient.

The Annual Report of the Department for the Insane was read by John Story Jenks, which was accepted and referred to the incoming Board to print as much of it as they think proper.

A vote of thanks was given to the President and Board of Managers for the efficient manner in which the Hospital had been conducted for the past year.

JOSEPH G. ROSENGARTEN, *Chairman.*

JOHN T. LEWIS, JR., *Secretary.*

# OFFICERS APPOINTED BY THE MANAGERS FOR THE ENSUING YEAR

---

## PINE STREET HOSPITAL

*Superintendent and Steward*  
DANIEL D. TEST.

*Chief Resident Physician*  
SAMUEL BRADBURY, 3D., M.D.

*Matron and Superintendent of Nurses*  
MARGARET A. DUNLOP.

## MEDICAL AND SURGICAL STAFF

### *Physicians*

ARTHUR V. MEIGS, M.D.,  
President of Staff.

MORRIS J. LEWIS, M.D.,

JAMES C. WILSON, M.D.,

ALFRED STENGEL, M.D.,

JAMES TYSON, M.D.,

J. NORMAN HENRY, M.D.

### *Surgeons*

RICHARD H. HARTE, M.D.,

ROBERT G. LECONTE, M.D.,

JOHN H. GIBBON, M.D.,

JAMES P. HUTCHINSON, M.D.,  
Secretary of Staff.

*Director of Ayer Laboratory*  
WARFIELD T. LONGCOPE, M.D.

*Resident Pathologist*  
JEAN V. COOKE, M.D.

### *Anesthetizer*

EVA M. McNINCH.

---

### *Resident Physicians*

A. LOVETT DEWEES, M.D.,	HENRY RAWLE GEYELIN, M.D.,
HAROLD H. MORRIS, M.D.,	ARTHUR H. HOPKINS, M.D.,
JOHN H. MUSSER, JR., M.D.,	W. GARRISON MARKS, M.D.,
EDWARD B. KRUMBHAAR, M.D.,	JOHN P. GALLAGHER, M.D.

---

*Clerk*, MILTON M. BERGEY.

*Clerk*, FREDERICK W. SELLICK.

*Apothecary*, GEORGE W. MILLER, P.D.

*Assistant Matron*, MARTHA G. BYERLY.

*Assistant Superintendent of Nurses*, CAROLINE VINCENT McKEE.

*For Officers of the Department for the Insane, see Page 87.*

## OUT-PATIENT DEPARTMENT

### *Medical Clinic*

CHARLES D. HART, M.D.,                    JOHN K. WALKER, M.D.,  
ARTHUR NEWLIN, M.D.,                    GEORGE W. NORRIS, M.D.

### *Assistants*

FREDERICK FRALEY, M.D.,                    HENRY K. DILLARD, M.D.,  
WILLIAM DRAYTON, JR., M.D.,                    WILLIAM N. BRADLEY, M.D.

### *Surgical Clinic*

FRANCIS T. STEWART, M.D.,                    CHARLES F. MITCHELL, M.D.,  
EDWARD B. HODGE, JR., M.D.

### *Assistants*

FRANCIS O. ALLEN, M.D.,                    A. BRUCE GILL, M.D.,  
J. STEWART RODMAN, M.D.,                    WARREN WALKER, M.D.

### *Eye Clinic*

PETER N. K. SCHWENK, M.D.,                    WILLIAM T. SHOEMAKER, M.D.

### *Assistants*

J. WILLIAM PANCOAST, M.D.,                    GEORGE S. CRAMPTON, M.D.,  
M. BEHREND, M.D.,                            ALBERT C. SAUTTER, M.D.

### *Ear, Throat, and Nose Clinic*

FRANCIS R. PACKARD, M.D.

### *Assistants*

GEORGE M. COATES, M.D.,                    RUFUS B. SCARLETT, M.D.,  
EDGAR J. STEIN, M.D.

### *Gynaecological Clinic*

ASTLEY P. C. ASHHURST, M.D.,                    W. ESTELL LEE, M.D.

### *Clinic for Mental and Nervous Diseases*

A. R. MOULTON, M.D.,                            CHARLES B. WILLIAMS, M.D.,  
HORACE PHILLIPS, M.D.,                            GEORGE W. McCAFFERTY, JR., M.D.

### *Dermatological Clinic*

CHARLES N. DAVIS, M.D.

### *Assistant*

FRANK CROZER KNOWLES, M.D.

## REPORT

OF THE BOARD OF MANAGERS TO THE CONTRIBUTORS  
TO THE PENNSYLVANIA HOSPITAL AT THEIR 159TH  
ANNUAL MEETING, HELD FIFTH MONTH 2D, 1910.

---

The following table shows the operations of the Pine Street Hospital—the Department devoted to the treatment of the sick and injured—during the year:

Number of patients remaining in wards Fourth Month, 24th, 1909 .....	241
Received in the wards during the year.....	4132
Total number treated in beds during year.....	4373
Remaining in the wards Fourth Month, 23rd, 1910.....	236

### RECEIVING WARDS “THE WALTER GARRETT MEMORIAL BUILDING”

The number of cases received and treated during the year was 27,498, of whom 4132 were transferred to the beds of the Hospital, as shown in the above table.

The ambulances have been in service 1098 times, and the police-patrol wagons have made 2126 trips to the Hospital. As in the past, the Police Officers continue their careful attention to those who fall into their hands and require hospital treatment.

### OUT-PATIENT DEPARTMENT “THE WILLIAM E. GARRETT MEMORIAL BUILDING”

Into this Department there were received of Surgical Cases, 11,504; Medical, 2283; Eye, 3465; Ear, 1033; Nose and Throat, 2604; Dermatological, 1350; Gynaecological, 365; Mental and Nervous, 69;—making a total of 22,673, and, with those received in Receiving

Ward, making a grand total of 50,412 patients, men, women, and children, treated in the several Departments of the Pine Street Hospital for the year.

#### EXPENSES

The total expenditure for the maintenance of the Department for Sick and Injured the past year was \$163,548.50, of which only \$16,375.70 was received from patients and \$5648.83 from other sources, leaving a balance of \$141,523.97 to be paid by the income from invested funds and contributions for current expenses.

This amount has been expended for the care of the sick and injured who were unable in any way to repay the Hospital for the benefits received, and, though still in excess of the income for this purpose, is not so much as in former years.

Under these conditions the Managers trust that the friends of the Hospital will continue their interest in it, and help to keep this great Charity in the front rank of its kind.

#### CHANGE IN BOARD OF MANAGERS

John B. Garrett, who served as a member of the Board for 30 years with great fidelity and usefulness to the Hospital, felt his health required his resignation as a Manager. It was accepted with much regret by the Board, the members feeling they would miss his advice and counsel.

The vacancy on the Board was filled by the election of Edward H. Coates.

#### IMPROVEMENTS

New iron steps have been placed to the Memorial Wards, to replace wooden steps that have been in use for years.

The old stable in the rear of the Out-patient Department on the North Side of Spruce Street has been

entirely remodeled, and rooms added, making much more space for the rapidly increasing work of that Department.

Also a drug-store has been fitted up, and with an attendant, where patients can have prescriptions put up at a minimum cost, and it is being very largely used by them.

A dish-washer and a potato-peeler have been added to the Kitchen Department, whereby the work is much more expeditiously and economically done.

The following improvements are proposed, and are being considered by the Board:

A new coal-vault, adjoining the present one attached to the boiler-house, so that there can be stored an additional supply of 400 tons of coal, making over 500 tons in all, to carry the Hospital over any contingency of bad weather, etc., during the Winter Season.

It is also proposed to move the office of the Hospital from its present quarters in the main building on Pine Street to the entrance hall (of the Assembly Hall), thereby placing it nearer to the gate on Eighth Street, and giving more room for the increasing work required.

The following names have been placed on appropriate tablets in the halls of the Hospital, commemorating the bequest of

EDWIN N. BENSON

and the establishment of Free Beds in the names of

WILLIAM M. FARR

FRANCES CLARK

J. NORMAN JACKSON

WILLIAM H. JENKS

ELIZABETH NORRIS

### GIFTS

Mrs. Anna H. Sheldon, \$20,000 in securities, to be known as the "Charles Hartshorne Fund" for Social Service Work in connection with the Hospital.

John L. Borsch & Co., Apparatus for Eye Clinic;  
Henry H. Collins, Venetian blinds for private rooms;

John S. Jenks, Jr., Desk and chairs for office; Ames Iron Works, Repairs to large engine at net cost and services free of experts and erecting men.

#### CHANGES IN THE STAFF

Dr. J. Alison Scott, for many years a member of the Medical Staff, and, previous to that, a Resident-Physician, died Eighth Month, 13th, 1909. Dr. Scott was a valuable and efficient officer, and in his death the Hospital has lost a friend and a prominent physician.

Dr. J. Norman Henry was elected to fill the vacancy in the Staff.

As referred to in the last Annual Report, there have been changes made in the organization of the Medical and Surgical Staff of the Hospital, and, in conformity with the practice of many hospitals, and with the advice and consent of the Staff, an age limit has been fixed when Physicians and Surgeons will be retired from active work in the Hospital, but they will be continued on the rolls of the Hospital as Emeritus Physicians and Surgeons.

The positions of Assistants to the Chiefs in the Out-patient Department have been created and the places filled. This provides for more efficient work in the various clinics of that Department.

There has, also, been a change made in the manner of electing Resident-Physicians, and, hereafter, four will be elected in the Spring, from graduates in medicine or members of the Senior Class in Schools of Medicine who will graduate in June, to go on duty as vacancies occur during the following year beginning Seventh Month, 1st.

#### TRAINING SCHOOL FOR NURSES

Miss E. Ada Payne, after a most acceptable service of two years as Matron and Superintendent of Nurses, resigned, to take effect in Sixth Month last,

and Miss Margaret A. Dunlop was elected to fill the vacancy, and began her service at once.

The Report of this Department for the year ending Third Month, 25th, 1910, shows that the Nursing Staff of the Hospital consists of 1 Assistant, 9 head nurses, 59 pupil nurses and 10 probationers, a total of 79 nurses.

The training of the pupil nurses in maternity nursing is now fully established, and three nurses are constantly in attendance at the Preston Retreat for two months each, receiving instruction in that branch of nursing, so that all nurses now graduating have had experience in all branches of their calling.

The Graduating Exercises were held Third Month, 31st, 1910. Dr. James C. Wilson addressed the class. John T. Lewis, Jr., presided and presented the diplomas and badges to the following nurses:

MARGARET J. GREENE,  
SARA DETWILER,  
SARA L. VORIS,  
MINNIE L. WINTERSTEEN,  
MARION McCUNE RICE,  
MARGARET MADDEN,  
MARY ENGLE DOUGLASS,  
HELEN DEREMER,  
MARGARET SMEDES,

MINNA J. CONN,  
NELLIE WILLIAMS,  
MARY ELIZABETH BALDWIN,  
HELEN EV LYNN MARTINEZ,  
FLORENCE T. WORTHINGTON,  
EDNA ELIZABETH KAUFMANN,  
ESTHER ELIZABETH SHAFER,  
MABEL HUNT,  
HATTIE OSWALD ROTHERMEL.

The Misses Blanchard kindly sent a Christmas gift of \$50.00, and subscriptions to magazines as usual. Other gifts for the use of Nurses were: John Story Jenks, magazines; Miss Jennie Hoffman, tickets for lectures; Miss Hoffman and Miss Ellen Morris, tickets for concerts, all of which were much enjoyed.

Doctors Meigs, LeConte, Packard, Newlin and Schwenk, together with Dr. Bradbury, have given efficient attention to the sick nurses.

## SOCIAL SERVICE WORK

A special department in connection with the work of this noble charity has recently been inaugurated through the agency of a social service worker, Mrs. M. J. Megee, who devotes her entire time to bettering home conditions, so that patients can receive the full benefit of the Hospital treatment while in the Hospital, without unnecessary mental anxiety, and to helping the Dispensary patients to intelligently carry out the instructions given by our doctors.

The expense of this work has been borne up to the present time by some kind friends, and a portion of the future cost will be met by the generous gift of Anna Hartshorne Sheldon, who has contributed certain securities toward an endowment, the income from which is to be devoted to this service.

Work of this kind has been introduced into some of the leading hospitals of the Country, and, having the hearty endorsement and co-operation of the doctors and officers of our own institution, its success seems to be assured.

### LADY VISITORS

The "Lady Visitors," in their Report to the Managers of their work during the past year in the wards of the Hospital, say that "the Ladies have been most industrious and assiduous in their efforts in behalf of the inmates" and that "many have testified to the moral as well as physical improvement during their enforced stay in the Hospital."

Christmas was again enjoyed by all, each patient receiving a gift, and the children were delighted in a beautiful tree.

The Librarian reports that she gave out 3528 books, of which 2546 were English, and the others in eleven different languages, and that there was a greater demand for Bibles than usual.

AYER CLINICAL LABORATORY

The Report shows that during the year 12,355 examinations have been made. This is a much larger number than in former years, and a distinct broadening of the field of work. New and very valuable methods of diagnosis have been adopted as a part of the Laboratory routine.

The sixth number of the "Bulletin" is now in preparation.

## THE FARM

The Report of the Farm Committee shows that 421,332½ quarts of milk were produced and furnished to the various departments.

### INSANE DEPARTMENT

Dr. John B. Chapin, Superintendent and Physician-in-Chief of the Insane Department, reports:

Number in Hospital, Fourth Month, 22nd, 1909.....	454
Admitted during the year.....	205
<hr/>	
Total number treated.....	659
Discharged .....	218
<hr/>	
Remaining, Fourth Month, 21st, 1910.....	441
Of the number remaining, 190 are men and 251 are women.	

The cost of this Department has been:

Hospital for Men.....	\$109,292.60
Hospital for Women.....	163,502.12
Making a total of.....	\$272,794.72

No very large improvements have been made in this Department during the year. At the Women's Department the walls are being repaired and repainted, and a portion of the wall on Powelton Avenue, which was in danger of falling, has been reinforced with concrete and made safe.

The grading and planting of grass, trees, and shrubs on the old meadow-land lately filled in has been finished, and greatly adds to the appearance of the grounds.

The wall of the Men's Department on Meadow (or 46th) Street is about to be removed, to be replaced with an iron fence similar to the one on the other side of the street at the Women's Department.

Five new pianos, the gift of two Managers, have been placed in the Wards for the use of the patients.

Other information regarding this Department will be found in Dr. Chapin's Report accompanying this.

---

The Managers must again thank the Medical and Surgical Staff, the Officers of the various Departments, the Nurses, and all connected with the Hospital for their efficient and faithful services and co-operation during the past year.

By order of the Board.

BENJAMIN H. SHOEMAKER, *President.*

JOHN T. LEWIS, JR., *Secretary.*

## GENERAL SUMMARY

OF RECEIPTS AND PAYMENTS OF THE TREASURER AND  
STEWARDS OF THE PENNSYLVANIA HOSPITAL FOR  
THE YEAR ENDING FOURTH MONTH 22d, 1910

### RECEIPTS

# REPORT

**OF THE PHYSICIAN-IN-CHIEF AND SUPERINTENDENT OF  
THE DEPARTMENT FOR THE INSANE OF THE PENN-  
SYLVANIA HOSPITAL.**

---

To the Managers of the Pennsylvania Hospital:

The following report of the Department for the Insane for the year ending Fourth Month, 21st, 1910, is herewith presented:

	MEN.	WOMEN.	TOTAL.
The number of patients in the Hospital			
Fourth Month, 22d, 1909.....	189	265	454
* Admitted during the year.....	100	105	205
	—	—	—
Whole number treated .....	289	370	659
Discharged .....	99	119	218
	—	—	—
Remaining Fourth Month, 21st, 1910.....	190	251	441
Daily average during the year.....	180	259	439

## RESULTS OF THE YEAR

	MEN.	WOMEN.	TOTAL.
Recovered .....	27	36	63
Much improved .....	4	15	19
Improved .....	11	19	30
Stationary .....	24	25	49
Died .....	21	23	44

## RESULTS SINCE THE OPENING OF THE NEW HOSPITAL IN 1841

	MEN.	WOMEN.	TOTAL.
Recovered .....	2579	2681	5260
Improved .....	1644	1879	3523
Stationary .....	1266	740	2006
Died .....	1154	924	2078
	—	—	—
Total .....	6643	6224	12,867

---

\* Of the number admitted during the year thirteen were cases of alcohol and drug habit. They do not appear in the Table of Results or Statistics.

The whole number admitted into the Pennsylvania Hospital prior to the opening of the Department in West Philadelphia in 1841.....	4,360
Admitted into the Department in West Philadelphia since its opening in 1841.....	12,953
Total .....	17,313

Of the patients discharged "recovered," five were residents of the Hospital less than one month; nineteen between one and three months; twenty-five between three and six months; eleven between six months and one year; three between one and two years.

Of those discharged "much improved," one was in the Hospital less than a month; three less than three months; eight between three and six months; four between six months and a year; three more than a year.

Of those who "died," one was in the house less than a week; six less than a month; seven less than three months; twelve between three months and two years, thirteen between two years and ten years; two between ten and twenty years; one, forty-one years; one, forty-five years; one, sixty-eight years.

The percentage of recoveries for the year based upon the admissions was thirty-four. This gratifying result is much in excess of previous years and is largely due to admission of patients in the early stages of mental disease during a period when the probability of restoration is greater than when morbid ideas and delusions have become fixed and established. With few exceptions the general health was impaired and so recorded on admission. There was a noticeable improvement mentally with the restoration of the impaired physical conditions which is an important indication for the line of treatment and the main reliance in the largest proportion of cases. There are scientific instruments of precision which may record

DEPARTMENT FOR WOMEN—THE VILLA

1887

various interesting phenomena, but a Fairbanks scale is one that may properly have a place in the armamentarium of every hospital.

The patients discharged recovered had been mentally afflicted and disordered on the average of fifteen weeks, according to the case histories furnished at admission. Two cases of melancholia, both women, may have a record as exceptional cases. One made a complete recovery after a Hospital residence of fifteen years, the second preserved an unbroken silence of six years.

Of the admissions, fifty-five per cent. presented symptoms indicating that the mental disorder was due rather to the disordered performance of the functions of the human mind than the mental symptoms that indicate or accompany organic changes of the brain.

The mortality based upon the whole number under care was six per cent. One death by suicide occurred.

During the year a patient, who was admitted in 1841, died after a residence in the Hospital of sixty-eight years—exceeding every record of which we have knowledge.

There has been a marked exemption from intercurrent diseases. During the prevalence of typhoid disease in Philadelphia in recent years but three cases occurred in the Hospital family, one of which was contracted prior to admission and the origin of the other two cases was unknown, notwithstanding the prevalence of the disease in adjacent parts of the city. The exemption can be ascribed mainly to the use of uncontaminated drinking water.

The duration of life of the insane is a question that frequently arises from various motives or reasons. Excluding deaths arising during recent insanity as from toxic conditions, exhaustion from acute mania, delirium from toxic conditions, the average duration

of human life of the chronic insane has been found to average twelve years. The duration of life of the insane cannot be predicated upon the tables the actuary of an insurance company prepares for ordinary use. The probabilities that life is shortened by inattention to health, loss of will power, mental incapacity, and neglect are undoubtedly correct. The importance of speedy restoration to health on the occasion of an attack of insanity has its economic as well as its medical suggestions.

The number of weeks patients were under treatment who were discharged recovered was nineteen. There has been a marked reduction in the average number of weeks of treatment as compared with earlier years. In the years 1899 and 1900, respectively, the duration of Hospital treatment was twenty weeks. The average reduction has often meant much to the patient as well as to interested families. It is probably true in all hospitals that improved methods of treatment and care, more intelligent professional views of the nature and pathology of mental diseases prevail, something also depends upon the morale of the nursing staff. The field is still open and one that angels may enter if they still come to earth as they once did to minister to the Divine Master, to impart kindness, sympathy, courage, and moral strength to distressed and disordered humanity. True religion may not consist in a belief and worship of creeds and doctrines, but has been defined "as the soul of man striving to achieve the life of God in this world." It may have various manifestations.

Whether the hospitals will ever obtain the services of the ideal nurse or attendant upon the insane is as much a problem to-day as it has been in the history of all of the hospitals of the world. Schools for the instruction of nurses in anatomy, physiology, and allied sciences are in a way to be encouraged as all additions of knowledge may be helpful, but in the absence of

ASHLEY HOUSE—DEPARTMENT FOR THE INSANE  
Pennsylvania Hospital for the Insane

sympathy for human suffering are but of little help at the bed-side. There are qualities of human sympathy and "heart" that are of priceless worth to our hospital population that cannot be inculcated in schools or imparted by any course of education. The promoters of the Emmanuel School, or the "New Thought," even have not deemed it essential to instruct their followers along scientific lines in order to practice the new cults with best results. The hospital is interested primarily in the training of its nurses and attendants for the *service* of the hospital. This is understood to be the inculcation of kindly relations toward patients, avoidance of practices that amount to abuse, implicit obedience to the direction of those in authority.

The whole number of persons actually employed in ward service including those engaged in night attendance is 151. The whole number engaged in night service is eighteen.

For many reasons it would be desirable if circumstances permitted that attendants were on duty in every ward of the Hospital both day and night. To secure the necessary and desirable service, at a period when there is so much unrest and instability generally prevailing, is one of the constantly recurring problems, not especially in our own experience but seems to be universal. Possibly and undoubtedly this is due to newly-opening occupations for both sexes more inviting perhaps than hospital service with its restrictions and less remuneration. There have been many changes by nurses, some of whom sought employment as private care-takers where their experience has enabled them to render useful service. Notwithstanding frequent changes, the Hospital has been fortunate in retaining many persons in its service who find in its work congenial employment and a good home. It is, I trust, proper to commemorate the names of two persons in

this connection—Annie Dinsmore, who served the Hospital thirty-eight years, and William Mowbray, who died during the current Hospital year after a service of forty years. Both were head nurses in their respective departments. The daily life of each was a living example of self-consecration to a religious duty.

The tables which it has been the custom to publish in recent years are continued. Some tabular statistics embodied in reports of former years have been discontinued. Supposed “causes” of insanity are regarded too speculative to have a scientific value and are discontinued. There are many facts that might be ascertained and published concerning the patients of a hospital that might be curious but of no more value than similar statements concerning an equal number of persons not in hospitals. The statistical tables of our reports that are retained embrace an analysis of several thousand cases beginning in 1841. They have a value because of the numbers that are tabulated. Several hospitals have adopted a practice of omitting all statistical information, reporting simply the number of admissions, discharges, and results.

We have been disposed to adhere to a classification of forms or types of mental disease which have been in use in former reports and formerly in common use. The terms are to be understood or accepted as groups of cases presenting prominent and uniform mental manifestations or symptoms. The terms have been in common use for many years, are fairly well understood by the courts, juries, the laity, and physicians in general practice. It is true that many new terms have been introduced drawn from the dead languages which, while they have a suggestion of mystery and the glamour of novelty, in themselves are meaningless. They represent the longings of science rather than the results of new discoveries. The human brain continues much the same as it has been constituted for thousands

PENNSYLVANIA HOSPITAL FOR THE INSANE

Delaware County Farm-House

1890

of years and its abnormal manifestations have not changed. In the absence of new discoveries on which to found a new classification there has been an open and ample field for theorization and speculation which any one may enter, but the acceptance of the value of results must be tested by a general understanding and consent. It is not to be understood that new forms of disease have been discovered but new names have been introduced. In Germany and portions of the United States forms of mental diseases, or new names in place of former designations, have appeared, which are not recognized in medical reports of hospitals of Great Britain, France, the English provinces, and some reports of hospitals in the United States. Possibly these anomalous conditions may yet be reconciled on other than geographical lines and national prejudices. The Medico-Psychological Associations of the latter group of countries have failed to agree upon the acceptance of the newly proposed nomenclature after prolonged consideration. The promoters of the new psychology have, however, added immensely to the already over-loaded nomenclature.

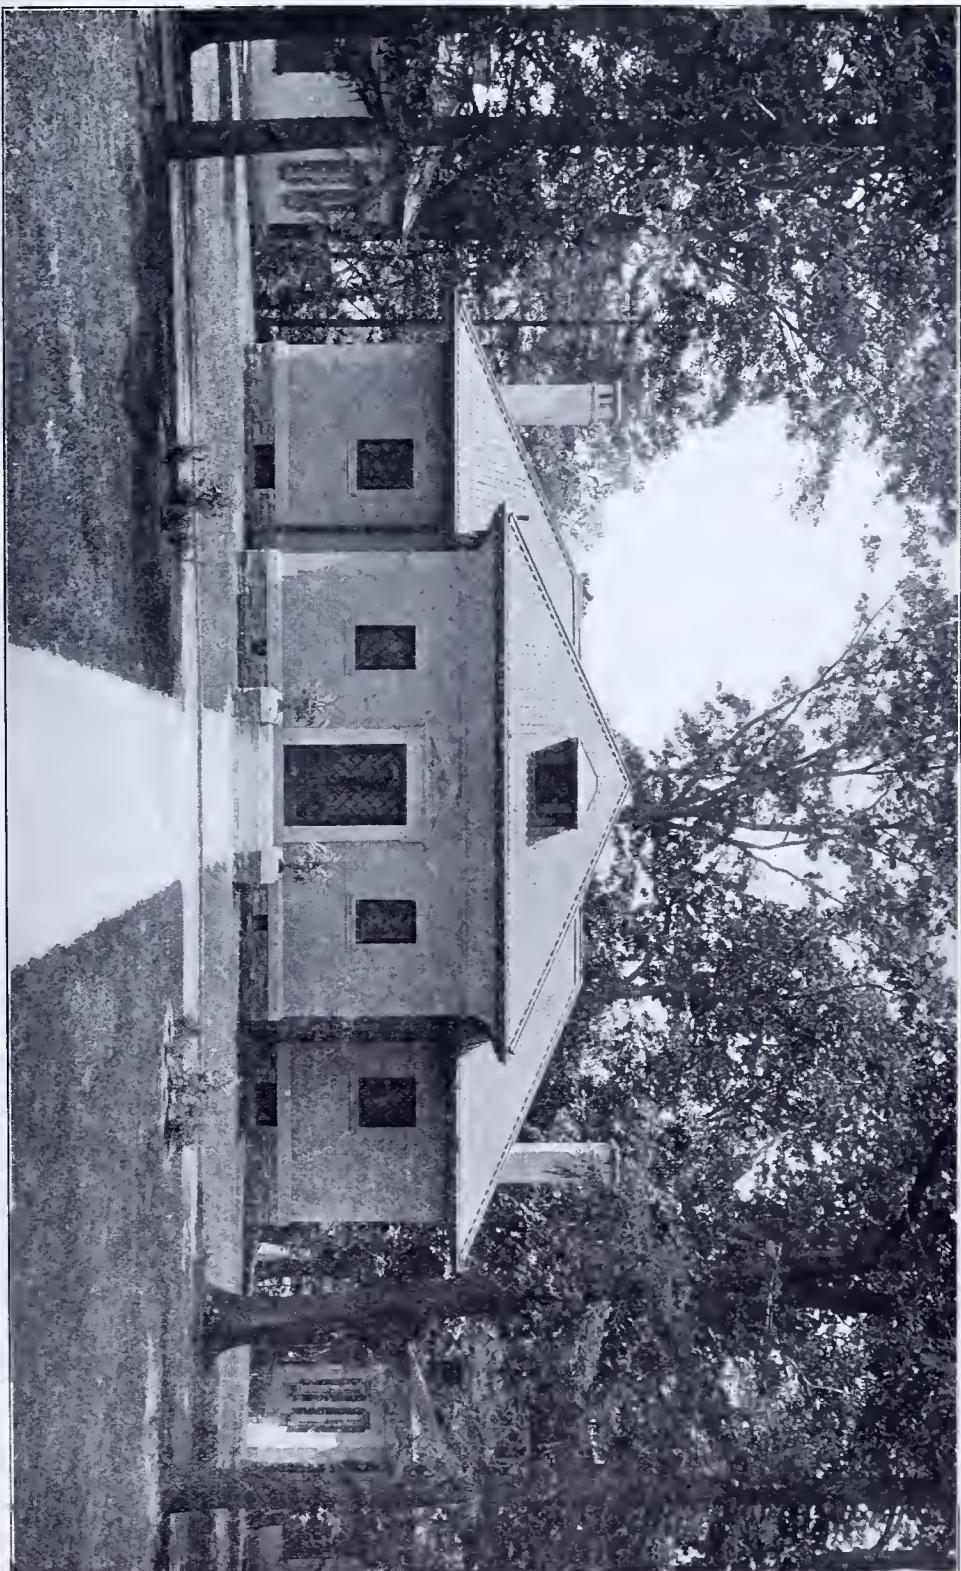

The tendency to introduce new names of supposed diseases or psychical states is even observed sometimes in medico-legal investigations of crimes of an atrocious nature, in the suggestion of new and unfamiliar terms to characterize and match the supposed mental state of a person charged with the offence. The practice sometimes affords a jury an opportunity of relieving the criminal from responsibility because of doubts that are impressed upon their minds by confusing hypothetical psychological theorizations.

Perhaps much of the tendency to speculate about the operations of the human mind arises from an erroneous hypothesis that it is an entity or force, the nature of which can be discussed. We know absolutely nothing of it except of its manifestations which for

convenience we may call normal or abnormal. The secret of vital force or psychical phenomena has not been and never will be revealed to man in his mundane state, whatever may be known hereafter.

Until recent years mental pathology had a rational physical, or somatic foundation. The creation of hospitals for the treatment of mental disease by physicians was a legitimate outcome of this belief. The case histories of all hospitals for the insane, taken at the admission of patients, show evidence of some change in the physical health. In our experience, which would be generally confirmed, it might be stated that ninety per cent. show more or less deterioration of the physical condition and the existence of functional disorders. The loss in body-weight of acute classes has been found to be marked, fully averaging twenty to thirty pounds. This is one of the results of the analysis at the time of admission. The obvious rational medical treatment suggested are efforts to restore the disordered functions to a normal state; to improve nutrition and the quality of the blood; to induce sleep, not necessarily by the abuse of drugs; to add to the body-weight by systematic administration of food, even sometimes obtained by discontinuing the use of hypnotic drugs; and the correction of the effects of toxic conditions. At the conclusion of a case recovered, and reviewing the means directed to the desired end, we have a right to conclude synthetically that the disease was decidedly somatic, or physical in its nature. If "a sound mind in a sound body" is a correct aphorism the converse is equally true.

On the other hand, within more recent years there has been a decided tendency to discuss the human mind as if it were a distinct entity that might be studied apart from its relation to the whole body as one of its organs, and to found a system of mental pathology wholly upon a psychic basis. It has its promoters

THE GILLINGHAM MEMORIAL BUILDING

1992

among alienists; the advocate of the "new thought" (whatever that may be), those who would establish so-called mental clinics; those who would practically substitute largely treatment by suggestion, hypnotism, and moral means for hospital treatment. The sincerity of some of these advocates ought not to be questioned. Their activity is not questioned although it has a suspicion of misdirection having a financial or other asset.

There has also been noticeable an extraordinary interest in clinical studies of physical and mental manifestations by alienist-students, some of which are no more surprising nor of greater professional interest than might be observed of groups of persons of different pronounced theological or political beliefs. Perhaps some of the names that appear in our redundant list of diseases may have had a suggestion from this source. It is to be hoped that in the contention between the doctrinaires who espouse the somatic or psychic theory of insanity, some advantage may yet come to the insane and even their medical and moral treatment be not wholly overlooked.

An annual report of the Hospital is intended to present a résumé of the work of the year as well as some statement of its receipts and expenditures which will be found in the separate report of the Steward. There may be some uniformity in the results from year to year. It may contain nothing really new to members of your Board. If it should announce marked changes yearly it might be inferred that there were no settled principles on which it was conducted. The reports are presented for perusal to the Contributors, to the friends of our patients and the Hospital, to the medical profession, and to the public who have an interest in whatever concerns the welfare and alleviation of a distressing disease and affliction. The regularity of the weekly personal visits and inspection of the property you manage, and your contact with patients and employed

persons, enables you to be informed of the physical condition of your property and to take action upon the applications for admissions to the Hospital, and observe their treatment. The visits of the Managers have been sympathetic and have furnished moral support to all persons concerned in a work that is most interesting yet not free from anxiety, responsibility, and depressing influences.

The attendance at the Out-patient Department on Spruce Street for consultation and advice by the physicians of this Department has been regular. There has been an increased attendance during the year. When the announcement of this service was first made it was supposed that large numbers would avail themselves of the offer for service. There are, however, at the present time several clinics in the city that are open to mental cases. The service is rendered Monday and Friday afternoons at three o'clock. The proposition was regarded as experimental and has been commended, and ought to be commended to persons suffering or threatened with the incipient stages of insanity. The number of new cases during the year was sixty-nine. The number of revisits was one hundred and thirty-six. Total two hundred and five.

During the long service and observation of my respected predecessor, Dr. Kirkbride, he gave much attention to the diversion and occupation of his patients. Whatever can be done in the direction of moral means to promote the recovery and improvement of the insane has been regarded as very important, and his practice in this direction has been studied and followed. No question has arisen as to the propriety of doing what is practicable to break the monotony of hospital life. Much has been done and is done, as means are afforded. Several years ago a provision was made, by a contribution of Hannah and Jane Morris, for the employment of a teacher of Art-work in the Women's

Department, three afternoons of every week excepting the vacation season. Recently, by means of a contribution of one thousand dollars by a Contributor of the Hospital for a similar purpose, the work for women has been enlarged and there is an assurance of its continuance.

Ashley House has been open during the entire year. Caley House was open for patients during the Summer months of 1909. Both houses furnished an agreeable change for our patients and have served a useful purpose when our Hospital wards needed some relief.

At each Department some entertainment has been provided every week-day evening during the year excepting during the vacation summer months. From contributions furnished by friends of the Hospital fifty-eight concerts and readings have been provided.

Drs. Moulton, Phillips, Williams, McCafferty, and Mr. Walter, Steward, have co-operated harmoniously and helpfully in the professional and other services of the Hospital in their respective departments.

We should not omit to record the faithful services rendered by so many of our nurses and other employees that require fidelity, self-control, and a large measure of tact and human sympathy for persons in distress.

It is a pleasure to report contributions made by a number of friends, who are interested in the welfare of our patients, and to acknowledge with thanks the following gifts, viz.:

From Mr. T. Wistar Brown, \$1000 for Art Class and occupation of women; from Miss Anne Thomson, Mr. Frank G. Thomson, and Mr. Clarke Thomson, \$300 for the amusement fund; from Mr. T. Wistar Brown, \$200 for the Christmas fund; from Mr. Henry H. Collins, \$200 for the Christmas amusement fund; from Mr. Clarke Thomson, \$100 for Christmas fund; from Ellen Murphy, \$50.00; from Mrs. Anna Williams, \$25.00 for Christmas fund; from Mr. Walter Tomkins,

\$25.00; from the Misses Sterrett, \$15.00 for Christmas fund; from Mr. Thomas W. Sparks, \$10.00; from Mr. Garfield Grater, \$11.70 for amusement fund; from N. C. Hiestant, \$7.00 for amusement fund; from Mr. Florence J. Heppe, \$5.00 for amusement fund; from Sophia Berger, \$5.00 for amusement fund; from Miss Charlotte J. Ingham, \$1.00 for Christmas fund; from Mr. T. Wistar Brown and Mr. John Story Jenks, five pianos; from The Estey Co., use of a grand piano for concert; from Miss Lilian M. Baugh, three pictures; from Mrs. Mary Morris, portrait of Wistar Morris; from Mr. School, packages of magazines; from Capt. J. L. Wilson, magazines; from The Franklin Fire Insurance Co., two subscriptions of Harper's Monthly; from Mrs. E. Spencer Miller, package of Christmas cards; from Mrs. Effingham Perot, box of magazines; from Century Flower Shop, box of cut flowers; Advocate and Family Guardian, New York; Miss Rachel Williams and friends, concert; Mr. Stevens and daughters, concert; Mr. John Thompson and friend, concert; Gustav K. Schmidt and friends, concert; West Philadelphia Cricket Club, concert; Dr. A. R. Moulton, Lecture on Paris; Mr. David P. Leas, two lectures; Francis I. Maule, six lectures; Mr. Francis A. Awl, lecture on the Philippines.

---

With a sense of thankfulness for all the blessings that have come to the Hospital during the year the foregoing report is respectfully submitted.

JOHN B. CHAPIN.

*Pennsylvania Hospital for the Insane,  
Philadelphia, Pennsylvania, U. S. A.,  
4th Month, 21st, 1910.*

# APPENDIX

## STATISTICS

### DEPARTMENT FOR THE INSANE

STATISTICAL TABLES.—The following statistical tables embrace patients received into the Department for the Insane since its opening in its present location on the First day of January, 1841.

TABLE I.—SHOWING THE FORMS OF DISEASE FOR WHICH  
12,269 PATIENTS WERE ADMITTED.

	Previously Re-		1909-1910.	
	M.	W.	M.	W.
Melancholia.....	1753	2200	25	34
Mania.....	2838	2965	40	52
Dementia.....	1161	740	15	12
Mania and Delirium from Toxic Conditions.	48	45	..	4
Paresis.....	244	42	9	..
Epilepsy.....	19	3	..	..
Imbecility.....	16	5	..	1

TABLE II.—SHOWING THE DURATION OF DISEASE AT THE  
TIME OF ADMISSION OF 13,458 PATIENTS.

	Previously Re-		1909-1910.		Total.
	M.	W.	M.	W.	
Not exceeding 3 months.....	2796	2849	30	55	5730
Between 3 and 6 months.....	775	826	13	18	1632
"    6 months and 1 year.....	868	770	12	12	1662
"    1 and 10 years.....	2090	1772	24	15	3901
10 years and over.....	266	209	9	3	487
Chronic, duration unascertained.....	25	20	1	..	46

TABLE III.—SHOWING THE CAUSES OF DEATH FROM FOURTH MONTH 22d, 1909, TO FOURTH MONTH 21st, 1910.

	M.	W.	Total.
Bulbar Palsy and Dementia.....	1	..	1
Chronic Cardiac Disease .....	..	3	3
Chronic Mental Disease.....	..	4	4
Debility of Old Age .....	3	9	12
Debility of Old Age and Senile Dementia.....	3	..	3

## ADMISSION OF PATIENTS

### INTO THE PENNSYLVANIA HOSPITAL FOR THE INSANE\* AT PHILADELPHIA

---

All classes of insane persons, without regard to the duration of the disease or its curability, are admitted into this institution. Idiots, however, it may be stated, are not received; and for the epileptic a special agreement should be made.

Preparatory to the reception of a patient, it is necessary to arrange the rate of weekly charge with a member of the Board of Managers,† and to furnish a certificate of the patient's insanity from two physicians, both of whom must be residents of Pennsylvania, who shall have examined the patient within one week of its date, and the certificate shall bear date within two weeks of the admission of the patient, and the same shall be acknowledged and sworn or affirmed to before some magistrate or judicial officer [*not before a Notary Public*], as required by an act of the Legislature of Pennsylvania, approved 1883. An "Order for the reception of a patient"‡ must be signed by a near relative or friend. Full and com-

---

\* *This is the only title of this institution, and the only proper direction for letters, etc.* Other names, occasionally used, are liable to make confusion by confounding it with another institution in the same vicinity.

† The names of these gentlemen will be found in the front of this Report, and their places of residence can be learned, on application at the Hospital, on Eighth Street, between Spruce and Pine, Philadelphia, where blank forms for physicians' certificates, bonds, etc., can always be obtained.

‡ Legal forms of certificates and admission papers furnished at the Hospital.

plete answers should also be given to questions in "Statement" which accompanies the medical certificates which will be furnished on application.

For the payment of board, and removal of a patient when discharged, security is always required from some responsible resident of the city of Philadelphia. Payment of board is always to be made quarterly in advance; and if the patient is removed *uncured*, before the expiration of the first three months, and contrary to the advice and consent of the Superintending Physician, board is required for thirteen weeks; otherwise the charge is only for the time actually passed in the Hospital, provided the time is more than four weeks.

Interest will be charged on bills not paid till after the expiration of the quarter.

Large chambers and private attendants can always be supplied, if desired by the friends of the patients.

Patients who are not residents of this State may be brought direct to the Hospital, where they may be received if the patients are manifestly insane and remain till the necessary medical certificates and the approval of the Managers can be procured, provided this be done within forty-eight hours. The papers should generally be completed before admission, and after consent for admission has been obtained.

The following are the forms for physicians' certificates, order for the reception of a patient, and the bond that is to be executed before the order of admission is given:

#### ORDER FOR THE RECEPTION OF A PATIENT

I, \_\_\_\_\_, the undersigned, hereby request you to receive \_\_\_\_\_, an insane person, as a patient into the Pennsylvania Hospital for the Insane, believing

that such detention is necessary for \_\_\_\_\_ benefit. Subjoined is a statement respecting the said \_\_\_\_\_.

To be signed by a near relative or friend.

Occupation, \_\_\_\_\_

Degree of relationship (if any) or other circumstances of connection with the patient. \_\_\_\_\_.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand nine hundred \_\_\_\_\_.  
To the Board of Managers of the Pennsylvania Hospital for the Insane, Philadelphia, Pa.

#### CERTIFICATE OF PHYSICIANS\*

We, the undersigned, residents of Pennsylvania, hereby certify that we have, within one week prior to the respective dates hereinafter mentioned, at \_\_\_\_\_, in the county of \_\_\_\_\_, separately examined \_\_\_\_\_ of \_\_\_\_\_, and do verily believe that the said \_\_\_\_\_ is insane, and that the disease is of a character which, in our opinion, requires that the person shall be placed in a hospital or other establishment where the insane are detained for care and treatment.

We further certify that we have been actually in the practice of medicine for at least five years, and that we are not related by blood or marriage to the said \_\_\_\_\_, nor in any way connected as a medical attendant or otherwise with the Pennsylvania Hospital for the Insane or other establishment in which it is proposed to place the aforesaid, and that we are graduates of an incorporated medical college.

\_\_\_\_\_, M.D.

Residence, \_\_\_\_\_.

\* As required by the law of Pennsylvania, approved 1883

Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand  
nine hundred \_\_\_\_\_.  
\_\_\_\_\_, M.D.

Residence, \_\_\_\_\_.

Dated this \_\_\_\_\_ day of \_\_\_\_\_, one thousand  
nine hundred \_\_\_\_\_.  
\_\_\_\_\_, M.D.

#### CERTIFICATE OF A JUDGE OR MAGISTRATE\*

I, \_\_\_\_\_, a \_\_\_\_\_, of \_\_\_\_\_  
county of the State of Pennsylvania, do certify that the  
foregoing certificate was duly† \_\_\_\_\_ to before me  
by the above-named \_\_\_\_\_ and \_\_\_\_\_ on this  
\_\_\_\_\_ of \_\_\_\_, 19\_\_\_\_, that the signatures thereto  
are genuine, and that the signers are physicians of  
good standing and repute.  
\_\_\_\_\_  
[L. s.]

#### EXTRACT FROM LUNACY LAW

SECTION 19. *The certificate above provided for shall have been made within one week of the examination of the patient and within two weeks of the time of the admission of the patient and shall be duly sworn to or affirmed before a judge or magistrate of this Commonwealth AND OF THE COUNTY WHERE SUCH PERSON HAS BEEN EXAMINED, who shall certify to the genuineness of the signatures and to the standing and good repute of the signers. Any person falsely certifying as aforesaid, shall be guilty of a misdemeanor, and also liable civilly to the party aggrieved.*

*Approved—The 8th day of May, 1883.*

#### OBLIGATION‡

In consideration of \_\_\_\_\_ being admitted  
as a patient into the "Pennsylvania Hospital for the  
Insane," established and maintained by "The Con-

---

\* Certificate of a Notary Public will not be accepted.

† Sworn, or affirmed.

‡ This obligation is to be signed by two responsible persons.  
The surety to be a resident of the city of Philadelphia, if practicable.

tributors to the Pennsylvania Hospital," we do jointly and severally promise to pay to the Steward of the said Hospital, or to his order, quarterly, in advance, \_\_\_\_\_ dollars \_\_\_\_\_ cents per week for board, and to provide or pay for all requisite clothing and other things deemed necessary or proper for the health or comfort of said patient; to pay for all glass or furniture broken or destroyed by said patient; to remove \_\_\_\_\_ when discharged; and if taken away *uncured*, against the advice and consent of the Superintending Physician, before the expiration of three calendar months, to pay board for thirteen weeks; or if removed, or discharged, within four weeks, with his approbation, to pay board for four weeks.\*

Witness our hands the \_\_\_\_\_ day of \_\_\_\_\_, 190 .

\_\_\_\_\_ [L. s.]

\_\_\_\_\_ [L. s.]

The above preliminaries having been complied with, an order is given by a Manager, authorizing the Physician of the Institution to receive the patient.

Letters relative to the admission of patients into the Department for the Insane and other correspondence may be addressed to any of the Managers or to DR. JOHN B. CHAPIN, Pennsylvania Hospital for the Insane, Forty-fourth and Market Streets (West) Philadelphia, Penna. [4401 Market Street.]

Entrance to "The Department for Men," on Forty-ninth Street, between Market and Haverford Streets.

Entrance to "The Department for Women," on Market Street, corner of Forty-fourth Street, or, 4401 Market Street.

---

\* If the patient recovers before the expiration of the period paid for, and leaves with the full approbation of the Physician, the excess is refunded, unless that time should be less than four weeks, for which period board is always required.

Out-Patient Department of Pennsylvania Hospital for Mental Disorders, corner Spruce and Darien Streets, Mondays and Fridays, 3 to 4 p.m.

Long Distance Telephone Connections:

Department for Men, Telephone Number, Preston 2567.

Department for Women, Telephone Number, Preston 2572.

SUBSCRIPTIONS AND DONATIONS will be received by any member of the Board of Managers, or by the Treasurer, Edward Y. Hartshorne, 409 Chestnut St., Philadelphia.

LEGACIES intended to promote the interests of the Pennsylvania Hospital should be given in its corporate name, viz.: I hereby give and bequeath to "THE CONTRIBUTORS TO THE PENNSYLVANIA HOSPITAL" and their successors and assigns forever (if real estate), all that, etc. (if personal property), the sum of, etc.

LEGACIES intended for the Department of the Insane should specify, in addition, "to be devoted to extending or improving the accommodations, and for the care of the insane."

Contributions of books, periodicals, pictures, engravings, curiosities for the museums, and whatever can tend to interest or occupy the patients, are always thankfully received.

Every contribution or legacy of \$10,000 adds one FREE BED to the number already in use for indigent, recent, and probably curable cases in the Department for the Insane.
